Valve Accessories &amp; Controls

# Our way of doing business is just as simple as our products.

Solid, simply designed positioners with high quality construction are just the start of the Valve Accessories and Controls. story. Because we are a privately held, customer-driven company, we can meet your needs much quicker, with a lot more flexibility.

## For example:

- **Customer driven**-we answer to the customer not a board, stockholder, or consultants.
- **Privately held**-allows us to focus, respond quickly, and be flexible.
- **Relationship**-we do business in a straightforward, open manner where a handshake means something.
- **Integrity**-we tell you what we can do and "stand behind" our words and our product-no questions asked!

A quality company must be a lot more than a quality product. Responding promptly and honestly, showing genuine interest in what we do and what you do, staying focused on our strengths, and being different in a positive way are important.

Sounds simple-we plan to keep it that way!
